New Book by Doctors for COVID Ethics Details Dangers of mRNA Vaccines

Recognizing that myriad mRNA vaccines are in the pipeline or already on the market — against flu, RSV, HIV, malaria, cancer, allergies, heart disease, to name a few — the information dispersed by "mRNA Vaccine Toxicity" is as "chilling as it is critical," according to Children's Health Defense President Mary Holland.

By Margot Desbois

Miss a day, miss a lot. Subscribe to The Defender's Top News of the Day. It's free.

The Doctors for COVID Ethics (DACE), an international group of physicians and scientists, last month released a new book, "mRNA Vaccine Toxicity," an extensive assessment of the mechanisms and manifestations of mRNA vaccine technology harm, through the perspectives of immunology, pathology, pharmacokinetics, epidemiology and medical history.

The book is available to download free of charge or order in print.

DACE, led by microbiologist and immunologist Dr. Sucharit Bhakdi, consists of more than 100 medical practitioners and researchers from 30 countries who "oppose the ongoing abuse of science and medicine for the destruction of peoples' health, livelihoods, and even lives," and believe "this abuse includes but is not limited to the public health measures taken in the contrived COVID 'pandemic.'"

In the months following the European Medicines Agency's (EMA) issuance of emergency approval for the COVID-19 vaccines, DACE wrote a series of open letters to the EMA warning of short-term and long-term health dangers from these experimental products and calling for their immediate withdrawal.

During the past two years, the group has conducted five online symposia and published numerous articles, letters, video presentations and other resources on current threats to health and freedom posed by the COVID-19 public health mandates.

Written and edited by DACE founding signatory and biochemist Dr. Michael Palmer, "mRNA Vaccine Toxicity " includes chapter contributions by Bhakdi; Brian Hooker, Ph.D., Children's Health Defense (CHD) senior director of science and research; Margot Desbois, CHD science fellow; and biochemist David Rasnick, Ph.D.

In the book's afterword, Catherine Austin Fitts, president of Solari, Inc., publisher of the Solari Report, provides insight into the broader implications of this scientific information and encourages readers to pass on this knowledge and resist the future deployment of harmful medical technologies.

RFK Jr./Hooker NEW book: Vax-Unvax. Order Now!

The foreword by CHD President Mary Holland, reproduced in full below, previews the book's contents:

> Anyone alive today may be forgiven for experiencing PTSD (Post-Traumatic Stress Disorder) about all things COVID—the lockdowns, the fear-mongering, the masking, the testing, the censorship, the suppression of effective treatments, the coerced experimental gene-based shots, and the pervasive injuries and deaths. After three years of horror, it is only human to want to put this behind us and to forget.
>
> Yet this book makes abundantly clear that we would do so at our own peril. This undeclared war against humanity is not over, and we must arm ourselves with knowledge.
>
> The point of this book is clear: "Every future mRNA vaccine will induce our cells to produce its own specific antigen, related to the particular microbe it targets. We must therefore expect each such vaccine to induce immunological damage on a similar scale as we have witnessed with those directed against COVID-19."
>
> Recognizing that myriad mRNA vaccines are in the pipeline or already on the market—against flu, RSV, HIV, malaria, cancer, allergies, heart disease, to name a few—this knowledge is as chilling as it is critical.
>
> The book warns: "First and foremost, we must accept that we are indeed in our governments' crosshairs. Instead of relying on their treacherous and malevolent guidance, we must therefore watch out for ourselves and our loved ones—do our own research and seek out honest health advice wherever it may be found, be it inside or outside the established venues of science and of medicine."
>
> You hold in your hands an indispensable primer. The book is comprehensive, drawing on a wide array of published scientific literature, reasonably short and highly readable—156 pages of text and 20 pages of citations—providing required reading on virology, immunology and toxicology. It has excellent citations, illustrations of viral and immune mechanisms, and stained tissue photographs of those who died from COVID-19 shots.
>
> The chapter on the epidemiology of COVID-19 mRNA vaccine adverse events is illuminating—looking at the vast harms to date. More than 13 billion COVID vaccine doses have been administered worldwide—almost two doses for each person on the planet. And the US dispensed 650 million doses, causing millions of adverse events.
>
> The types of injuries are remarkable for their breadth—including myocarditis, blood clotting throughout the body and neurological, immunological and reproductive harms. Still, the CDC has the audacity to call the vaccines "safe" and to recommend them for all people 6 months and up on at least an annual basis.
>
> The final chapter by David Rasnick chronicles how AIDS and HIV became the "blueprint for the perversion of medical science" that we continue to live through today. In the 1980s, Dr. Tony Fauci initiated "science by press release," proclaiming and enforcing an entirely new AIDS narrative.
>
> Rasnick cogently explains that the AIDS orthodoxy is false, having never been proven despite 40 years and billions of dollars invested. He writes:
>
> "[A]s incredible as this may sound, there has not been a single scientific study designed or conducted to determine whether or not AIDS—or even HIV—is sexually transmitted. . . .
>
> "Since WWII—but especially in recent decades—the stifling of debate and the persecution of dissenters has become entrenched in virtually every major field of science in the US. It is particularly virulent in the so-called biomedical sciences. . . .
>
> "The conjoining of government, big business and academe which President Eisenhower warned about in 1961 now rules the world. . . . The COVID-19 fraud is the AIDS scam writ large. . . . We are in the middle of a global totalitarian takeover and things are going to get much worse in the months ahead."
>
> The book's overall conclusion echoes Rasnick:
>
> "It is not a stretch to interpret the actions of the authorities as 'honest mistakes.' Too much has occurred that points unequivocally to a sinister agenda behind the gene-based COVID-19 vaccines. The rushed approval without necessity, the outright threats and the coercion, the systematic censorship of honest science and the suppression of the truth about the numerous killed or severely injured vaccine victims have all gone for far too long to permit of any doubts as to intent and purpose.
>
> "Our governments and the national and international administrative bodies are waging an undeclared war on all of us . . . [T]his war has been going on for decades, and we must expect it to continue and to escalate."

While this well-founded information is both alarming and depressing, knowledge is power. If we come to grips with the reality that past and future harm from mRNA vaccines is both intentional and inevitable, we can protect ourselves and our loved ones.

Forewarned is forearmed. Read this book and keep it close as a reference until we've turned the page on this dark chapter in global history.

Great organization, great scientists. I follow them through UKColumn.
Imagine a vaccine so safe that you have to be threatened to take it–for a disease so deadly you have to be tested to know if you have it...

AUG 8, 2023 URGENT: Italian researchers find Covid vaccine myocarditis relapses in teenage boys following apparently complete initial recovery
The mRNA shots are the gift that keeps on giving. At best, we may be maintaining a lot of teens and young adults for heart damage for a long, long time.

Why are you and Mr. Kennedy not calling for removal of these from the market as bioweapons?

Speaking of "Ethics," to make matters worse, Dr. Malone recently revealed that doctors and hospitals were (and perhaps still are) receiving "incentive bonuses" from Anthem, funded by the US Government, for each shot of vaxx administered. See Malone's substack here: https://drmalone.substack.com/p/...

Does the vaccine have a 5G chip in it and turn you into a magnet?

The Covid-19 injection contains graphene oxide, which is a receiver for 5g radiation.
this also explains the magnetism and with 5G you can control it by changing the frequency.
5g with a 60Mhz frequency separates ferritin from the blood and oxygen no longer flows in the blood.
The graphene oxide also has microbots, i.e. circuits, and the cell phone recognizes the covid injected person
I tried to find a video about it but couldn't find it anymore.
